GC68 Digital Indicator

Overview

This digital indicator is used in combination with a pressure transmitter. Easy-to- use digital pressure indication ability and analog output functions are built in one compact enclosure.

Features

- •It can supply electrical power directly to pressure transmitter with easy wiring.
- 4 digit large LED display and 2 relay contacts for comparator output.
- It can act 3 roles: pressure indication, transmitter and switch with various functions including loop check, scaling.
- Selectable from panel or surface mounting.
